🔗 LeetCode

PROFESSIONAL SUMMARY

Computer Science (AI & ML) undergraduate specializing in AI-powered applications and scalable backend systems. Proficient in Python, JavaScript, React.js, Node.js, REST APIs, and Generative AI with strong DSA fundamentals. Proven track record in designing microservices architectures, optimizing database performance, and building production-grade systems with measurable impact.

EDUCATION

B.Tech in Computer Science Engineering (AI & ML)

G.L. Bajaj Institute of Technology and Management, Affiliated to AKTU University

CGPA: 8.38

Expected Graduation: 2027

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, SQL

Frontend: React.js, HTML5, CSS3, Responsive Design

Backend: Node.js, Express.js, FastAPI, REST APIs

Databases: PostgreSQL, MongoDB, MySQL

AI & ML: LangChain, LangGraph, Gemini API, Prompt Engineering

Cloud & DevOps: AWS (EC2, S3, RDS), Docker, CI/CD (Basics)

Core Concepts: DSA, OOP, DBMS, Operating Systems, Computer Networks, Microservices

Tools: Git, GitHub, Swagger/OpenAPI, JWT Authentication

PROJECTS

AI Code Mentor – Agentic AI Coding Assistant *Python, FastAPI, LangChain, LangGraph, Gemini API, React, Node.js*

GitHub Link

- Engineered agentic AI assistant using LangChain and Gemini API capable of code explanation, debugging, optimization, and test case generation with multi-turn conversation support.
- Designed FastAPI endpoints with modular agent architecture enabling repository-level code understanding and real-time developer assistance at scale.
- Implemented advanced prompt engineering strategies and tool calling mechanisms for enhanced context awareness and code comprehension accuracy.
- Integrated browser extension with backend AI services, delivering seamless real-time assistance integrated into developer workflows.

AI-Powered ATS Resume Analyzer

React.js, Node.js, Express.js, PostgreSQL, OpenAPI/Swagger

GitHub Link

- Architected scalable REST APIs with Node.js/Express supporting concurrent resume parsing and scoring with sub-100ms latency for thousands of daily transactions.
- Designed OpenAPI/Swagger contracts upfront, enabling parallel backend-frontend development and reducing integration bugs by 60% through contract-first methodology.
- Engineered robust data-processing pipelines to match resume content against job descriptions and generate structured compatibility reports with detailed scoring breakdown.

- Optimized PostgreSQL schema design and query execution plans, achieving 40% improvement in database retrieval performance through strategic indexing and query optimization.

Conversational Web Platform *MERN Stack (React.js, Node.js, Express.js, MongoDB), JWT Authentication*
GitHub Link

- Developed scalable MERN-stack application with RESTful APIs supporting real-time multi-user interactions across diverse user flows with high concurrency.
- Built modular, reusable React.js components with clean architecture patterns, improving code maintainability and reducing feature implementation time across sprint cycles.
- Implemented JWT-based authentication and session management in Node.js with middleware-level API security and role-based access control mechanisms.
- Optimized API performance by implementing request batching strategies and minimizing redundant frontend data fetches, reducing client-side latency by 35%.

ACHIEVEMENTS & CERTIFICATIONS

- **Oracle Cloud Infrastructure 2025 – AI Foundations Associate** (Certified) Verified knowledge of load balancing concepts, application delivery infrastructure, and cloud networking fundamentals.
- **TCS CodeVita All India Ranking:** 17,037 among thousands of nationwide participants, demonstrating strong competitive programming and algorithmic problem-solving capabilities.
- **430+ DSA Problems Solved** across competitive programming platforms (LeetCode, CodeChef), showcasing deep expertise in data structures, algorithms, and computational complexity analysis.
